

Wentao Xie

Research

My research tackles human-centric problems through **ubiquitous sensors** and **Artificial Intelligence of Things (AIoT)** systems. I design ubiquitous sensing platforms—spanning embedded devices, on-body and ambient sensors, and IoT infrastructures—and develop robust AI models that lower the barrier to measuring and interpreting human activities. These activities range from those happening inside our body (e.g., respiration, cognition) to more obvious physical activities (e.g., gestures, motions), enabling applications such as **home-based healthcare** and **HCI on edge devices**. My research is highly interdisciplinary and transferable, where I work closely with domain experts such as health professionals and UX/UI designers to identify physical world problems and solve them using ubiquitous sensing methods. Some of my research outputs are currently being deployed to benefit end users.

Keywords: Ubiquitous computing, HCI, AIoT, cyber-physical systems (CPS), smart healthcare, wearables

Appointment

Sep 2024– **The Hong Kong University of Science and Technology**, Hong Kong
Department of Computer Science and Engineering
Research Assistant Professor

Education

2019–2024 **The Hong Kong University of Science and Technology (HKUST)**, Hong Kong
Ph.D., Computer Science and Engineering
Thesis: *Understand Human Behaviours with IoT Sensors: From Physical to Physiological Sensing*
Supervisors: Prof Qian Zhang and Dr Jin Zhang

2015–2019 **Southern University of Science and Technology (SUSTech)**, Shenzhen, China
B.Eng., Computer Science and Engineering

Achievements and Awards

Oct 2023 Research Travel Grants, HKUST
Feb 2023 Research Travel Grants, HKUST
Aug 2022 HKUST RedBird Academic Excellence Award, HKUST
Oct 2021 HKTIIT Post-Graduate Excellence Scholarship, Hong Kong Telecom Institute of Information Technology (HKTIIT)
Aug 2019 Distinguished Final-year Thesis, SUSTech

Teaching

Spring 2025 **Instructor**, COMP4021 - Internet Computing, HKUST
Fall 2025 Students will learn full-stack web application programming skills, including web languages such as HTML, JavaScript, and PHP, and common libraries/frameworks such as jQuery, AJAX, Express, etc. Course modules contain lectures, labs, and projects.
Student feedback rating: 4.4/5, department average: 4.15, university average: 4.05

- Spring 2025 **Instructor**, *UROP1100-2100 - Undergraduate Research Opportunities Series*, HKUST
- Fall 2025 Lead a small group of undergraduate students in engaging with research activities, including idea brainstorming, prototype implementation, and empirical studies.
- Fall 2022 **Teaching Assistant**, *COMP4621 - Computer Communication Networks I*, HKUST
Delivered lab tutorials and designed the course project
- Fall 2022 **Teaching Assistant**, *COMP4531 - Mobile Computing and Smart Sensing*, HKUST
Prepared course lab materials and designed the course project.
- Fall 2022 **Teaching Assistant**, *COMP4021 - Internet Computing*, HKUST
Delivered lab tutorials and graded lab assignments.

Supervision and Mentoring

- Fall 2025– **Yuxin Tan**, *Mentored PhD student*, HKUST
- Spring 2025– **Yixuan Liu**, *Undergraduate research intern*, HKUST
- Fall 2025
- Spring 2025– **Lambo Qin**, *Undergraduate research intern*, HKUST
IMWUT'26 in submission
- Spring 2025– **Yankai Zhao**, *Visiting Master's student*, SUSTech
CHI'26
- Fall 2024– **Akshat Agarwal, Sukruti Rai**, *Final-year Project students*, HKUST
- Spring 2025 Project title: *Stock Exchange Simulator*
- Fall 2024– **Yizhen Zhang**, *Mentored PhD student*, HKUST
UbiComp'26 in submission
- Fall 2023– **Chi Xu**, *Mentored PhD student*, HKUST
UbiComp'24, MobiCom'25 and one IMWUT'26 paper in submission

Professional Services
